

CHROME OXIDE

Introduction

Hunter Chemical LLC offers a variety of Chrome Oxide products and value added services. Our spray results, applications testing and customers' experiences yield strong positive feedback including Ra tests and hardness tests significantly stronger than the competition. Ra values range from 58-90 (as sprayed) depending on the cut sprayed and the parameters followed.

Product	Range
HC10	5 – 15 μm
HC15	10 – 25 μm
HC18	15 – 30 μm
HC20	20 – 45 μm
